Data notes

- AMC sees mostly shoppers reached by Sponsored Ads; rates and trends are reliable, raw counts are understated.

- Sponsored Ads only: DSP touches and DSP-attributed sales are not included.
- Rows under ~100 shoppers are withheld by AMC. They stay in totals and are never attributed.
- No Subscribe & Save activity in the window; repeat = bought earlier (from Oct 2025) or 2+ orders in the month.
- Repeat history starts at the lookback date, so early months have a shorter purchase history than later months; part of the rise in repeat share over the year comes from that longer window.
- Spend per NTB order uses all Sponsored Ads spend and ranks months; it is not an isolated acquisition cost.
- TrailHeads sells cold-weather running accessories (gloves, mittens, hats, headbands); the season peaks Nov–Jan, so Jan is the high month in this window and Apr–Jul are low.
- US marketplace only; the other TrailHeads marketplaces are not in this AMC instance.
- Product names are not shown: the US Seller Central account is not connected in MAP.
- By ASIN: ASINs with fewer than 100 customers in 2026 are grouped as Other ASINs.
- Search terms: terms with fewer than 5 NTB shoppers are grouped as Long tail.

Reporting window: Jan 1 – Sep 30, 2026 (complete months)

Repeat lookback: from Oct 1, 2025

Path to conversion lookback: 30 days before each buyer's first order of the month (from Dec 1, 2025)

Attribution: purchases attribute for 14 days after the ad interaction

Data pulled: Oct 30, 2026

This analysis is XP Strategy proprietary methodology. All findings are derived from Amazon Advertising and Seller Central data supplied for the reporting period. Figures reflect the account state at report creation.
