NTB Search Terms

NTB shoppers who clicked the term in the same campaign within 14 days before their NTB purchase, Jan 1 – Sep 30, 2026. A shopper who clicked two terms counts for both. Term spend is all spend on the term.

WHAT THE DATA SHOWS

- Branded searches brought 77.1% of NTB orders at $6 per NTB order.
- Generic searches brought 5.1% at $14 per NTB order.
- 0.0% of NTB orders sit on terms below the 100-shopper privacy floor and are not attributed to a term.

Data notes

- AMC sees mostly shoppers reached by Sponsored Ads; rates and trends are reliable, raw counts are understated.
- Sponsored Ads only: DSP touches and DSP-attributed sales are not included.
- Rows under ~100 shoppers are withheld by AMC. They stay in totals and are never attributed.
- No Subscribe & Save activity in the window; repeat = bought earlier (from Oct 2025) or 2+ orders in the month.
- Repeat history starts at the lookback date, so early months have a shorter purchase history than later months; part of the rise in repeat share over the year comes from that longer window.
- Spend per NTB order uses all Sponsored Ads spend and ranks months; it is not an isolated acquisition cost.
- Repeat is shown without a Subscribe & Save split for this account; any SnS buyers are counted inside Repeat.
- AMC history predates XP Strategy management; Jan-Sep 2026 is read from the advertiser's AMC instance.

Reporting window: Jan 1 – Sep 30, 2026 (complete months)

Repeat lookback: from Oct 1, 2025

Path to conversion lookback: 30 days before each buyer's first order of the month (from Dec 1, 2025)

Attribution: purchases attribute for 14 days after the ad interaction

Data pulled: Nov 3, 2026

This analysis is XP Strategy proprietary methodology. All findings are derived from Amazon Advertising and Seller Central data supplied for the reporting period. Figures reflect the account state at report creation.
