Data notes

- AMC sees mostly shoppers reached by Sponsored Ads; rates and trends are reliable, raw counts are understated.
- Sponsored Ads only: DSP touches and DSP-attributed sales are not included.
- Rows under ~100 shoppers are withheld by AMC. They stay in totals and are never attributed.
- No Subscribe & Save activity in the window; repeat = bought earlier (from Oct 2025) or 2+ orders in the month.
- Repeat history starts at the lookback date, so early months have a shorter purchase history than later months; part of the rise in repeat share over the year comes from that longer window.
- Spend per NTB order uses all Sponsored Ads spend and ranks months; it is not an isolated acquisition cost.
- Displate sells metal posters (licensed art) and its own magnetic wall-mount kits; the mount kits carry most of the ad-attributed volume.
- Search terms: terms with fewer than 5 NTB shoppers are grouped as Long tail.
- By ASIN: ASINs with fewer than 100 customers in 2026 are grouped as Other ASINs (the catalog has thousands of low-volume poster ASINs).

This analysis is XP Strategy proprietary methodology. All findings are derived from Amazon Advertising and Seller Central data supplied for the reporting period. Figures reflect the account state at report creation.
