Source: Amazon Ads campaign reports

Seller Central is not connected for this account, so total sales, TACoS, units, sessions, inventory and Search Query Performance are not available. Advertising history: SP from 2026-08-02. Ad metrics have no year-over-year comparison yet.

- Ads-only review: Seller Central is not connected in MAP for this account, so total sales, TACoS, organic share, inventory and Search Query Performance are not shown.
- Ultimate Washer also resells parts from other makers (Mosmatic, Suttner and others); searches for those names are classed as competitor terms unless the ASIN advertised is the same brand.
- Short ad history for this profile in MAP, so the prior 30 days and the trend charts are partial.
- US Ads profile only; Canada spend is excluded.
- Budget check: Amazon's estimate uses Oct 1–7 for one constrained campaign and Oct 7–13 for the other two.
